

App Developer (iOS & Android)

m/f (Freelancer)

to plan and implement mobile apps for iOS and Android. (Native & Cross-Platform)

WHO WE ARE LOOKING FOR?

We are looking for passionate and experienced programmers/computer scientists who are real team players and also have a talent to look at complex problems/content in a simple way and most importantly solve it that way. We are looking for people who understand communication and who are not afraid to learn new technologies to solve a problem in the best possible way.

WHAT YOU SHOULD BE ABLE TO DO?

- Excellent knowledge in iOS programming with Swift or Objective-C with Xcode
- Excellent knowledge of Android programming using Java or Kotlin in AndroidStudio
- Experience with SQL and NoSQL database systems.
- Very good communication & teamwork skills
- The ability to familiarize yourself with already existing projects
- A structured and analytical way of thinking
- A good sense of clean code & UI/UX design

BONUS SKILLS

- Knowledge of React Native with Expo and JavaScript
- Knowledge of Flutter with Dart
- Knowledge of OpenGL ES, SceneKit, SpriteKit or Metal
- Knowledge of NativeScript

WHAT WE OFFER

- We offer exciting projects such as Native, Cross-platform and Hybrid apps for iOS and Android
- We offer an agile team
- We offer space for your own creative ideas

Interested? Then send us your application documents with CV, already implemented work, references and Github profile via email to application@smartelegphantapps.com.

We are looking forward to your application!
