

JavaScript Fullstack Developer

m/f (Freelancer)

to plan and implement Single-Page-Applications and Progressive Web Apps in the Frontend and Powerful Backends with Node.js.

WHO WE ARE LOOKING FOR?

We are looking for passionate and experienced programmers/computer scientists who are real team players and also have a talent to look at complex problems/content in a simple way and most importantly solve it that way. We are looking for people who know something about communication and who are not afraid to adopt new technologies to solve a problem in the best possible way.

WHAT YOU SHOULD BE ABLE TO DO?

- Excellent knowledge of **JavaScript** or **ECMAScript 2015** and newer
- Excellent knowledge of **HTML5/CSS3** and **Web APIs**
- Excellent knowledge of **Angular, Vue.js** and/or **React**
- Excellent knowledge with **Node.js (Express.js, Mongoose, Testing, ...)**
- Experience with **Scrum & Git**
- Experience with **SQL** and **NoSQL** database systems
- Very good communication & teamwork skills
- The ability to familiarize yourself with already existing projects
- A structured and analytical way of thinking

BONUS SKILLS

- A very good feel for **UI/UX design**
- Experience with real-time communication using **WebSockets** and **socket.io**
- Experience with **Apache Cordova, Ionic** and/or **Electron**

WHAT WE OFFER

- We offer exciting projects such as modern SPAs and PWAs with sophisticated backends.
- We offer an agile team
- We offer space for your own creative ideas

Interested? Then send us your application documents with CV, already implemented work, references and Github profile via email to application@smartelegphantapps.com.

We are looking forward to your application!
